CMN Academic Year 2021-2022

Notice to prospective, new and returning CMN students, Faculty and staff of Federal Student Disclosure Requirements:

In compliance with Code of Federal Regulations 668.46 and the federal Higher Education Act of 1965, as amended by the Higher Education Opportunity Act of 2008 (HEOA), the College of the Muscogee Nation is providing the required disclosures for the 21/22 academic year. The following reports contain both general and specific information related to attending the College of the Muscogee Nation as well as drug/alcohol policies and campus crime and fire reports which contain statistics for the previous three years concerning reported crimes that occurred on-campus; in certain off-campus buildings or property owned or controlled by CMN; and on public property within, or immediately adjacent to and accessible from, the campus. Additionally, the reports contain institutional policies concerning campus security, such as policies concerning sexual assault, drug/alcohol violations, conduct, and other matters.

Please find the Consumer Information Guide, College Catalog, Student Handbook, Campus Crime Awareness/Security Report and Fire Safety Report, and the Drug and Alcohol Prevention Program (Part 86), and the Part 86 Biennial Review at [https://cmn.edu/consumer-information/](https://cmn.edu/consumer-information/). For a printed version of each report please visit CMN office #128 in the main CMN Administrative and Educational Building located at 2170 Raven Circle, Okmulgee, OK, 74447.

Voter’s Information: We encourage students to exercise their right to vote. Please visit the following links for more information about registering to vote within the national and tribal elections.

CMN Vaccination Requirements

Oklahoma state law requires all students who attend Oklahoma public or private postsecondary institution for the first time provide documentation of vaccinations against hepatitis B, measles, mumps, and rubella (MMR).

Measles, Mumps, and Rubella (MMR)
Immunization is a safe and effective way to protect you against vaccine-preventable diseases that can hurt, cripple and even kill. The following three contagious diseases can spread rapidly among non-immunized individuals in a group situation, such as a college campus.

Measles is a serious disease characterized by rash and moderate to high fever. It can lead to pneumonia, serious ear infections, deafness, and convulsions develop in one out of every 1000 cases, one in ten of such complicated cases will result in death. Rubella or German Measles is an infectious viral disease characterized by mild fever and rash. The major risk is to non-immune women who catch he disease early in pregnancy. Such women are likely to have a baby with serious birth defects. Mumps is an acute viral infection characterized by fever and by swelling and tenderness of one or more salivary glands. The most common complications of the disease include deafness from secondary ear infections (1 per 15,000 cases), meningoencephalitis (3.5 per 1,000 cases), and death (1-3.5 per 10,000 cases).

Hepatitis B (HBV) Immunization
Hepatitis B is a serious viral infection of the liver that can lead to chronic liver disease, cirrhosis, liver cancer, liver failure, and even death. The disease is transmitted by blood or body fluids and many people will have no symptoms when they develop the disease. The primary risk factors for Hepatitis B are sexual activity and injection drug use. This disease is completely preventable. Hepatitis B vaccine is available to all age groups. A series of three (3) doses of vaccine are required for optimal protection. Missed doses may still be sought to complete the series if only one or two have been.

If you have any questions, please contact the Admissions Office at 918-549-2847 or email Admissions@cmn.edu.
